

WHY INSTALL A FRONIUS RESERVA

Durable & Reliable

Built to Last: Backed by a 10-year warranty and Fronius' renowned Austrian engineering, the Reserva is designed for long-term reliability and performance.

All-Weather Design: Purpose-built for Australian conditions, the Reserva can be installed indoors or outdoors for maximum flexibility.

Significant Cost Savings

Lower Bills & Optimised Solar: Store excess solar energy and use it during expensive peak periods – like evenings – to cut your electricity costs.

High Power Output: With strong charge and discharge capabilities, the Reserva easily supports large household loads such as air conditioning, ovens and pool pumps simultaneously.

Silent Operation: Unlike generators, the Reserva operates whisper-quietly, making it ideal for residential areas.

Reserva

Backup Power & Energy Independence

Reliable Backup: The Reserva delivers seamless backup power during outages – switching automatically to keep your essential circuits running.

24/7 Energy Use: Paired with solar, it enables true energy independence by letting you use your own renewable energy day and night.

Smart, Powerful Performance

Seamless Integration with Fronius GEN24: The Reserva pairs perfectly with Fronius GEN24 inverters, delivering a smooth solar and battery experience for maximum efficiency.

Modular, Stackable Design: Its space-saving, stackable design allows you to add more battery units as your energy needs grow.

Fronius Solar.web: Control and monitor your solar generation, battery status, and energy use all from a single app – anytime, anywhere.

Eco-Friendly & Adds Value

By storing and using your own clean solar energy, the Reserva helps lower your carbon footprint, adds long-term value to your home, and protects you from rising energy costs.

The Complete Home Energy Solution

As a Fronius Solutions Partner, Hardy Solar installs the Fronius Reserva – a reliable, efficient, and future-ready battery system. We love the Fronius range for its smart performance and quality engineering, giving you confidence your system will deliver for years to come.
